Practice Environment Improvements

July / August 2019

We are improving our environment

Both Manby and North Somercotes surgeries will shortly be having building work undertaken - this is part of our continuing infrastructure improvement programme.

Manby

Improvements to the pathways leading to the car park will take place at the end of August and beginning of September (and dependent on the weather!).

Work undertaken will give a smoother surface making it safer to walk and push wheelchairs/pushchairs along.

We apologise for any inconvenience caused and assure you we will complete the work as promptly as possible. Some disruptions to access may occur and you may have to access the surgery via the front entrance. We recommend that you avoid parking in the car park if possible as space will be significantly limited whilst the work is completed.

North Somercotes

Pathway refurbishments at the rear of the surgery are being undertaken. This should only have limited impact on patients but you may notice increased activity due to our contractors.

Various internal environmental improvements are also being undertaken at both sites - this should have only limited impact on patients as we will endeavour to undertake this work at quieter times of the day. However, you may find there is some increased activity due to our contractors.
